

ADITYA SINGH DANGI

Delhi, India

Email: adityasinghdangi9899@gmail.com — +91-8178900995 — LinkedIn — GitHub

PROFESSIONAL SUMMARY

Software Engineer with 1+ years of experience building enterprise banking applications using **Java**, **Spring Boot**, **Angular**, **REST APIs**, and **SQL**. Experienced in delivering secure backend services and scalable frontend features while collaborating with cross-functional teams in Agile environments to solve complex business problems.

EDUCATION

Bhagwan Parshuram Institute of Technology
Bachelor of Technology (Information Technology)

2021 – 2025
CGPA: 8.75/10

TECHNICAL SKILLS

Programming Languages: Java, JavaScript, TypeScript, SQL
Frameworks: Spring Boot, Spring Security, Hibernate, JPA, Angular
Backend Development: REST APIs, JWT Authentication, Authorization, Swagger/OpenAPI
Databases: PostgreSQL, MySQL
Developer Tools: Git, GitHub, Docker, Maven, Postman, IntelliJ IDEA, VS Code
Concepts: DBMS, Object-Oriented Programming, Data Structures, Algorithms, Debugging, Agile, SDLC

EXPERIENCE

Newgen Software
Software Engineer

Feb 2025 – Present
Delhi, India

- Led frontend development for **CoPad**, CitiBank's enterprise banking platform used by global settlement operations, delivering **production-ready** features in **10** releases.
- Modernized **CoPad**'s frontend by migrating modules from **Angular 8** to **Angular 15**, resolving compatibility issues in **data tables**, **PDF exports**, **TypeScript**, and other legacy dependencies to improve maintainability.
- Designed **settlement dashboard** features including **business-day ageing calculations**, **advanced filtering**, and **search**, streamlining **trade-review workflows** for **Citi EMEA operations teams**.
- Implemented an **Excel upload workflow** that parsed uploaded **trade ID** spreadsheets and invoked existing APIs to retrieve matching records, automating **bulk export generation** and eliminating **manual row-by-row selection**.
- Partnered with **CitiBank** stakeholders to refine requirements, troubleshoot **production issues**, and support **User Acceptance Testing (UAT)** during **Agile** release cycles.
- Coordinated deployments across **multiple testing environments**, executed **validation testing**, and resolved **deployment issues** to ensure **stable, client-ready releases**.

PROJECTS

AI-Powered Credit Card Fraud Detection System [\[Link\]](#) *Spring Boot, Angular, PostgreSQL, Docker* **2026**

- Architected a full-stack fraud detection platform using **Angular (Signals, inject() API, RxJS)** and **Spring Boot**, structuring the application with **Layered Architecture** and **Clean Code** principles to separate fraud scoring, alert management, and administrative workflows.
- Secured the platform with **Spring Security**, **JWT Authentication**, and **Role-Based Access Control (RBAC)**, restricting fraud-review and card-blocking actions to authorized administrative roles.
- Integrated **Google Gemini AI** with a rule-based fraud detection engine to generate fraud risk scores, confidence levels, and AI-assisted recommendations supporting fraud investigation decisions.
- Built fraud alert workflows, card-blocking services, and an administrative review dashboard with email notifications; documented REST APIs using **Swagger/OpenAPI** and containerised the application with **Docker** for consistent deployment across environments.

Fitness Exercises Application | *Angular 15, RxJS, RapidAPI*

2025

- Designed and developed a fitness exercise search application using **Angular 15**, integrating a third-party **RapidAPI** service to provide real-time search and filtering across **100+ workout categories**.
- Implemented reusable components, routing, shared services, and **RxJS**-based asynchronous data handling with loading and error states to improve application responsiveness and maintainability.

ACHIEVEMENTS & CERTIFICATIONS

Hackathon: Smart India Hackathon 2023 - developed the frontend of a Bus Tracking Application.

Achievement: Solved **500 DSA problems** across multiple platforms such as Leetcode, Code 360, including **150+ Medium** difficulty problems and achieved 100 days of streak.

Certifications: **Full Stack Web Development** and **Java Data Structures & Algorithms** (Udemy).
